

GUDDU SHARMA

Full Stack AI Developer | AI/ML Engineer | Technical Team Leadership | GenAI & Automation

guddusharma0071@gmail.com | +91-90570-57804 | Jaipur, Rajasthan | linkedin.com/in/ErGudduSharma | github.com/ErGudduSharma

SUMMARY

Full Stack AI Developer with hands-on experience building AI-powered applications, GenAI solutions, RAG pipelines, multi-agent systems, full-stack applications, and workflow automations. Experienced in leading technical teams, developing backend and frontend systems, designing AI workflows with n8n, and integrating modern LLM platforms including Claude, ChatGPT, Grok, and Google Gemini. Strong experience with Python, FastAPI, React, LangChain, LangGraph, RAG, Vector Databases, REST APIs, AWS, Docker, and CI/CD.

TECHNICAL SKILLS

Languages & Frameworks: Python, SQL, FastAPI, React, REST APIs, WebSockets

AI / GenAI / LLM: Generative AI, Agentic AI, AI Agents, Prompt Engineering, LangChain, LangGraph, RAG Pipelines, LLM Fine-Tuning, Google Gemini, Claude, ChatGPT, Grok, OpenAI APIs, Transformers, Hugging Face

Automation: n8n, AI Workflow Automation, API Integrations, Business Process Automation

NLP: Named Entity Recognition (NER), Text Classification, Sentiment Analysis, Tokenization, Embeddings

ML / Deep Learning: Scikit-learn, Random Forest, SVM, Regression & Classification, Hyperparameter Tuning, Cross-Validation, Feature Engineering, Model Evaluation, CNN

MLOps / Cloud: DLOps, CI/CD Pipelines, Docker, AWS Cloud, Git & GitHub

Data & Databases: NumPy, Pandas, Matplotlib, Seaborn, EDA, Data Cleaning, Statistical Analysis, MySQL, PostgreSQL, Vector Databases (FAISS, Pinecone, Chroma)

Leadership & Development: Technical Team Leadership, Task Planning, Code Review, Team Coordination, Project Delivery, Debugging

Tools: Postman, Streamlit, Jupyter Notebook, Google Colab, VS Code

WORK EXPERIENCE

Full Stack AI Developer | Create Consciously AI Pvt. Ltd. | April 2026 – Present | Jaipur, India

- Leading a technical team in the planning, development, integration, testing, and delivery of AI-powered and full-stack applications.
- Developing end-to-end web applications using Python, FastAPI, React, REST APIs, databases, and AI/LLM integrations.
- Designing and implementing AI-powered workflows, prompt engineering solutions, and automation pipelines using n8n.
- Working with modern AI tools including Claude, ChatGPT, Grok, and Google Gemini for development, research, automation, and AI solution design.
- Managing technical task allocation, development priorities, code reviews, debugging, and coordination across team members to support timely project delivery.
- Building and integrating AI agents, APIs, automation workflows, and backend services for business-oriented applications.

Data Science Intern | Regex Software Services | May 2025 – March 2026 | Jaipur, India

- Designed and deployed scalable end-to-end ML pipelines in Python to process and analyze 10,000+ records, enabling automated extraction of actionable strategic insights that supported data-driven decision-making.
- Fine-tuned Random Forest and SVM classification and regression models using GridSearchCV, RandomizedSearchCV, and k-fold cross-validation, achieving ~20% improvement in prediction accuracy over the baseline.
- Conducted comprehensive EDA and feature engineering using Pandas, NumPy, Matplotlib, and Seaborn, uncovering 3+ high-impact data patterns.
- Architected and prototyped a RAG-based document Q&A tool using LangChain and FAISS, reducing manual data lookup time by ~40% for the analytics team.
- Integrated Transformer-based LLMs and RAG architectures into traditional ML workflows, with real-time API endpoints built on FastAPI.

PROJECTS

AI Ops Research Agent (Feb 2026) | LangGraph · Google Gemini · Tavily API · FastAPI · React

- Architected an autonomous multi-agent AI system using LangGraph orchestration that generates structured research papers from a single user prompt by coordinating planning, web search, writing, and review agents.
- Integrated Tavily API for real-time web data extraction and automated literature review, reducing research preparation time by ~70%.
- Built a full-stack real-time monitoring dashboard using FastAPI and React with live WebSocket updates.

Intelligent AI Services (Jan–Feb 2026) | LangGraph · Gemini Pro · FastAPI · NLP · REST APIs

- Engineered a stateful multi-agent workflow orchestrator using LangGraph that decomposes unstructured business requests into structured, validated, executable workflows.
- Developed an AI Planning Node powered by Gemini Pro and an LLM-based NER pipeline to extract structured JSON entities with field-level validation.
- Implemented a Hybrid Security Layer and exposed services through FastAPI REST APIs with end-to-end API testing using Postman.

DLOps-Based CNN Image Classification System (Nov–Dec 2025) | Python · CNN · DLOps · CI/CD · AWS

- Designed a modular end-to-end CNN Computer Vision pipeline with components for data ingestion, preprocessing, training, evaluation, and inference.
- Implemented YAML configuration, CI/CD automation, versioned model artifacts, structured logging, and experiment tracking.
- Deployed the trained CNN model on AWS using S3 and EC2 with a FastAPI inference endpoint and Weights & Biases monitoring.

AI Agent WhatsApp Chatbot (Nov 2025) | Python · NLP · WhatsApp API · Real-time DB

- Engineered a production-deployed WhatsApp AI chatbot automating 1,000+ daily conversations across education and food service domains using NLP-based domain detection.
- Achieved 95% intent classification accuracy using a fine-tuned text classifier and reduced response turnaround from hours to seconds.
- Integrated real-time database context persistence and high-availability deployment supporting 100+ concurrent sessions, contributing to a 60% operational cost reduction.

EDUCATION

B.Tech — Mechanical Engineering | Anand International College of Engineering, Jaipur | Jul 2017 – May 2021

Self-Directed AI/ML Professional Development | 8+ structured courses covering Machine Learning, Deep Learning, NLP, LLMs, RAG, AI Agents, MLOps, DLOps, Computer Vision, GenAI | 2022 – 2025

CERTIFICATIONS

- LangChain for LLM Application Development — DeepLearning.AI (Andrew Ng), 2025
- Google ML Crash Course — Google Developers, 2024
- Hugging Face NLP Course — Hugging Face, 2025
- AWS Cloud Practitioner Essentials — AWS Skill Builder, 2025

KEY ACHIEVEMENTS

- Delivered a production-deployed AI chatbot achieving 95% NLP intent classification accuracy and 60% operational cost reduction, autonomously handling 1,000+ user conversations daily.
- Built a LangGraph-powered AIOps multi-agent research system capable of generating complete structured research papers from a single prompt and coordinating 4+ specialized agents end-to-end.
- Improved ML model prediction accuracy by ~20% through hyperparameter optimization and cross-validation at Regex Software Services.
